

Team Members Present:

Date:

Period:

Your team's 5 minute presentation must include:

1. A poster with your assigned body system:
 - a. Organs labeled
 - b. Zoom-in and explanation of each major tissue type
 - c. Zoom-in and explanation of major cell types
 - d. Explanation of system functioning in healthy Josh
 - e. Explanation of system functioning in sick Josh

2. Diagnose Josh - why is he sick?
 - a. As the doctor, what lab test(s) should you order?
 - b. What are the "normal" test values?
 - c. Predict and explain sick Josh's lab values
 - d. Suggest a treatment and explain how that will affect Josh's lab results

Rough draft of poster layout:

Lab tests investigated and applicable body systems:

- 1.
- 2.
- 3.
- 4.
- 5.

Steps to completion:

1. Determine the **scope** of the project
 - a. Who are the **stakeholders**?

- b. What are the expectations of the stakeholders?

2. **Group Member Roles:**

- a. List your group members and skills they bring to the project
 - b. Given the needs of the project and the skill set available, assign project roles to each group member

Group Member Name	Skill Set	Role

Additional resources:

1. List the **material resources** needed to complete the project, why you need them, and where/how you will obtain them.
2. List the **information resources** needed to complete the project, why you need them, and where/how you will obtain them.
3. List the **human resources** outside your group that you may need to complete the project. Explain why you need their help and how you will obtain it.
