

6. Write a strong justification paragraph for your decision on the topic. Make sure to answer the following questions while using the evidence (such as the facts and ethical considerations) to support your claim in a way that shows your reasoning.

- What is your position on this issue?
- What is the factual content to support your position that can be confirmed or refuted regardless of cultural or personal views?
- What ethical considerations can be included to support the position? (Respect for Others, Maximize Benefits/Minimize Harms)
- What are the views and interests of the individuals or groups affected by the decision that you think are most relevant to your position?
- What are the alternative options and why are they not as strong as your position?

My position on this issue is \_\_\_\_\_

\_\_\_\_\_. Facts that support my decision are \_\_\_\_\_,

\_\_\_\_\_, and \_\_\_\_\_.

I considered \_\_\_\_\_ (bioethical principle) when making the decision because \_\_\_\_\_.

\_\_\_\_\_'s views are the most relevant to my decision because \_\_\_\_\_.

\_\_\_\_\_. An alternative option is \_\_\_\_\_ but it is not as

strong as \_\_\_\_\_ an argument as mine because \_\_\_\_\_.
